

Charlie Godfrey

[godfrey-cw.github.io](https://github.com/godfrey-cw) | godfrey.cw@gmail.com | www.linkedin.com/in/godfrey-cw

Skills

- **Research:** empirical science of foundation models, novel deep learning architecture components, interpretable and explainable AI, evaluating and understanding trustworthiness of machine learning systems.
- **Data modalities:** computer vision, reinforcement learning, natural language processing.
- **Tools:** Python (PyTorch, Huggingface, NumPy, SciPy and Pandas), Git, Bash, Linux, cluster computing (SLURM), AWS (EC2).

Experience

Postdoctoral Research Associate, [Pacific Northwest National Laboratory](#)

October 2022 - Present

- Adapted highly efficient MosaicBERT language model training to internal cluster computer environment, obtaining a 50% improvement in throughput.
- Improved performance of segmentation models for multispectral satellite images (5 % relative increase in IoU) by implementing multi-GPU distributed training.
- Constructed datasets to measure out-of-distribution performance of computer vision models.
- Investigated safety and security of machine learning systems.
- **Skillset:** training/evaluation of large neural networks (including transformers), distributed (multi-GPU) training, parallel hyperparameter sweeps, unsupervised training, fine-tuning of pretrained models and transfer learning.

Select Invited Talks

1. June 2023 [ICERM Mathematical and Scientific Machine Learning Workshop](#).
2. February 2023 [Boston College Math and Machine Learning Seminar](#).
3. January 2023 [Joint Mathematics Meetings](#) (Boston, MA).
4. November 2022 [Purdue Algebraic Geometry Seminar](#).
5. October 2020 AMS Fall Eastern Sectional Special Session on Algebraic Singularities in Arbitrary Characteristic.

Education

PhD in Mathematics, The University of Washington-Seattle June 2021

- Extended results on singularities using inductive construction algorithms for semi-simplicial schemes. Built a new Fourier-type transform on differential forms with poles using duality theory. Defined generalizations of ordinary elliptic curves over finite fields and studied their deformations.
- Completed the [eScience Institute's Advanced Graduate Data Science Option](#) (PhD-level courses in machine learning, data visualization and statistical inference, implemented machine learning methods like LASSO, kernel regression and k-means clustering in raw numpy and scipy).
- Department of Mathematics Graduate Fellowship (2018-2019)

Master's of Science in Mathematics, The University of Washington-Seattle June 2018

Bachelor's of Science in Mathematics and Physics, The University of Wisconsin-Madison May 2014
